

**RIMEBOUND**  
STUDIOS

## Letter of Testimonial

9 May, 2025

Lukas R.

Rimebound Studios

Duisburg, Germany.

---

At Rimebound Studios, **Rafil Alam** has proven to be an exceptional talent whose contributions have significantly elevated our projects. They played a key role in enhancing our in-house game engine, **Unveiled Engine**, by optimizing the **Entity Component System (ECS)** for better performance and resolving persistent issues in our Python-based build system that previously caused file corruption. Additionally, they improved our **AI pathfinding system**, reducing memory leaks and ensuring smoother operation during stress tests.

Within the Roblox ecosystem, **Rafil Alam** showcased their creativity and technical skill by developing a *highly immersive* **bodycam system**, a robust and customizable **gun engine**, and a **dynamic vehicle system**. Each of these systems not only enhanced gameplay but also set new standards for quality and innovation in our projects.

Beyond their technical expertise, **Rafil Alam** brought a collaborative mindset to the team. They were always eager to share knowledge, mentor others, and contribute to a positive and productive work environment. Their ability to communicate complex ideas clearly made them an invaluable asset to our studio.

Though **Rafil Alam** has moved on to new opportunities, their impact on Rimebound Studios remains profound. We wholeheartedly recommend them to any organization seeking a talented, dedicated developer who consistently delivers excellence.

Best regards,

*Lukas R*
